Coming è centro di iscrizione riconosciuto e qualificato per i corsi offerti da
“Columbia University, School of continuing Education”

Visiting Students Programs

The School of Continuing Education at Columbia University is a resource for those who wish to take their lives in new directions.

Our students are motivated, serious, academically oriented people who seek professional, personal, or academic development in subjects that range from the sciences to the humanities to the arts.

The scope of the School extends far beyond evening classes for returning students. Our programs serve not only non-degree and professional students, but also hundreds of graduate and undergraduate Columbia matriculates every year.

- Thirteen professional master's degrees
- Post-baccalaureate study in over 50 subject areas
- Over 30 high school program curricular options
- Ten levels of ESL instruction
- Access to Arts and Sciences courses through Lifelong Learning Programs
- University's Summer Sessions

Though this offering is diverse, the programs are unified by our mission:
to transform knowledge and understanding in service of the greater good: a just,
sustainable and compassionate global society.

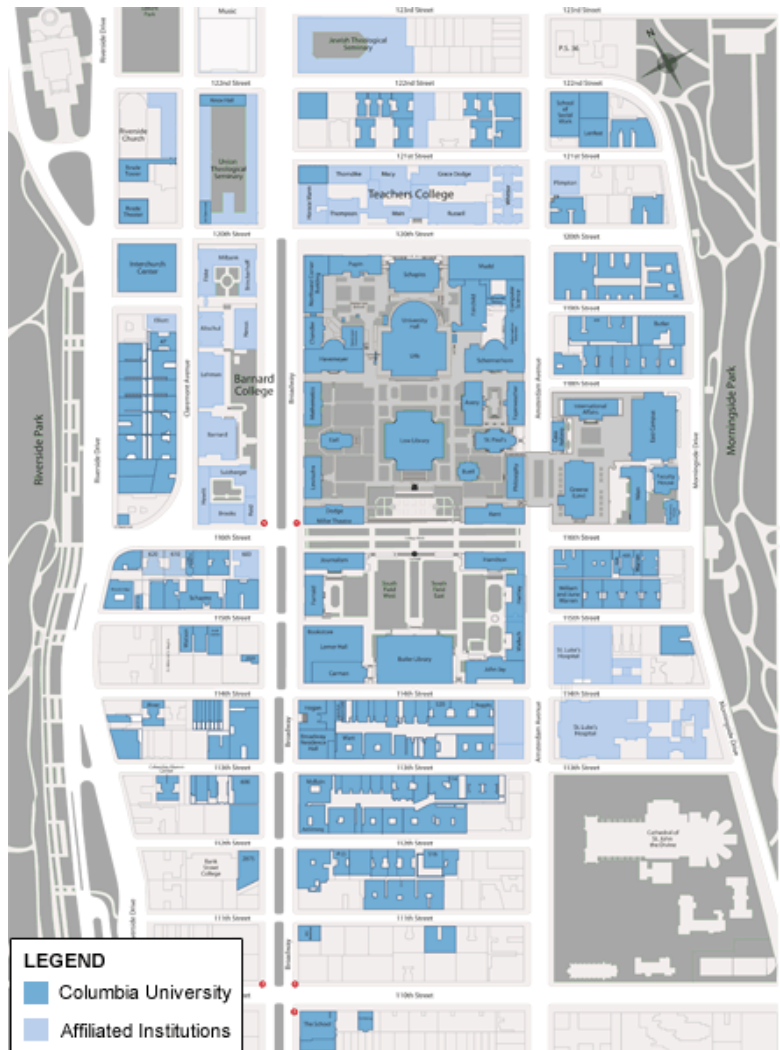

A Unique Campus

Columbia's beautiful Morningside campus houses all of the School of Continuing Education's activities, from academics to student life and athletics. It is also home to great science research facilities; and the Schools of Law, Business, Engineering, the Arts, International and Public Affairs, Graduate Arts and Sciences, and General Studies, Columbia College, and Teachers College.

In the Heart of a Vibrant NY City

Columbia offers the unique experience of a true college campus in the middle of New York City, with endless opportunities for enrichment. New York City has something for every taste and interest. A truly international city, New York welcomes students from around the globe to take explore the arts and culture, attend opera at the Met, go to a Broadway theater production, visit the world-class museums, walk through Central Park, and explore the Village, Chelsea, Soho and all of Manhattan's neighborhoods. The city's safe, reliable public transportation systems make all that the city has to offer convenient and accessible.

VISP Visiting International Student Programs

VISP may be for you if you are currently enrolled in a bachelor's or master's degree program at another college or university and you want to take courses for credit. VISP will help you to:

- enhance your academic record
- take courses for transfer to your home institution
- change your academic direction
- refine your English language and cross-cultural communication skills
- build credentials for graduate study

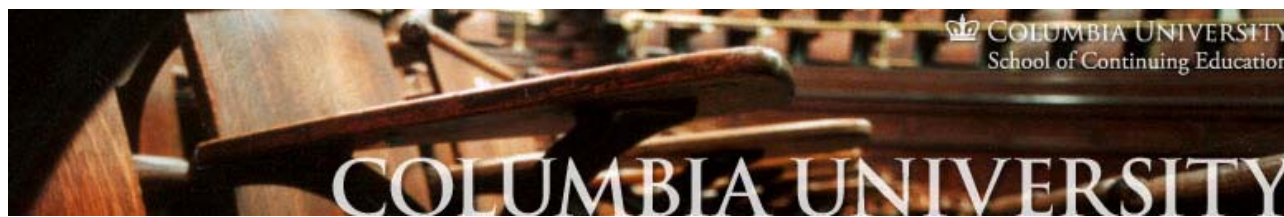

Visiting international students may enroll for a summer term, a semester, or a full year in a wide variety of undergraduate- and graduate-level courses in over 50 areas of study, taught by Columbia's distinguished faculty. The School's academic advisors help VISP students develop a unique program based on your needs. They help you select courses and introduce you to the wide array of services offered through the University. As a visiting student at Columbia you will gain access to all campus facilities; one of the 10 largest academic library systems in the country, computer labs, the gym and fitness center, as well as numerous cafes and lounges all over campus.

Requirements for admission

In order to qualify for a student visa through Columbia University, VISP students must be enrolled in full-time study for 12 or more points (the equivalent of four courses). Students must be in good academic standing and present a TOEFL iBT score of 100+ to be considered for admission. If you do not meet the English proficiency requirement, you may take American Language Program English courses in advance or concurrent with for-credit coursework.

Certificate Programs

The Postbaccalaureate Studies Certificate Programs (PSCP) may be for you if you already hold a bachelor's degrees and wish to prepare yourself for graduate school or academic or professional advancement. You have the opportunity to take University courses and develop a unique program based on your needs, or you may follow a specific, prescribed curriculum in numerous subject areas. Certificates require completion of four to eight courses.

Biotechnology

The program is ideal for college graduates with little or no background in biology who want graduate school preparation in biotechnology. The course plan is also useful for those interested in a career change or likely to work in fields that interact with the biotechnology industry, such as business or law.

Business

The program provides a comprehensive overview of the core fields of business. Through the rigorous curriculum, students master business fundamentals, and develop specialized knowledge in marketing, finance and management, while strengthening their strategic thinking skills. International students must either complete their coursework exclusively online, or take on-campus courses exclusively as a full-time student.

Classics

The curriculum is designed to improve the linguistic skills necessary for graduate study in classics and classical studies. It also prepares students for doctoral programs in ancient history, art history, philosophy, religion and medieval studies.

Critical Issues in International Relations

Jointly offered by Columbia's School of International and Public Affairs and School of Continuing Education, the program provides intensive study in the theory and practice of modern international politics.

Ecology, Evolution, and Environmental Biology

The program develops competency in the core sciences related to environmental biology—chemistry, biology, earth sciences, statistics and conservation biology.

Human Rights

Offered by the Institute for the Study of Human Rights at Columbia University through the School of Continuing Education, the curriculum emphasizes a multifaceted approach, focusing on economics, gender, and legal issues relating to the international struggle for human rights.

Psychology

The program is for college graduates who did not major in psychology but who want graduate school preparation in the field.

Quantitative Studies for Finance

The program is for college graduates who have some background in mathematics and statistics and want graduate school preparation in the mathematics and statistics of finance and financial engineering.

United Nations Studies

Jointly offered by Columbia's School of International and Public Affairs and School of Continuing Education, students explore the role of the United Nations Security Council in international peacekeeping and the U.N.'s economic development activities.

Strategic Communications: International Perspectives

This two-week summer program teaches corporate communications executives to develop and practice effective communications strategies to respond to the challenges and opportunities presented by operating in the global marketplace.

Postbaccalaureate Studies

Qualified individuals with bachelor's degrees who do not wish to pursue a structured certificate program may work with an advisor and design their own course of study, drawing on over 50 subject areas.

Requirements for admission

In order to qualify for a visa through Columbia University, PSCP students must be enrolled in full-time study for 12 or more points (the equivalent of four courses). Students must be in good academic standing to be considered for admission. TOEFL iBT score requirements vary by program.

Graduate Degree Programs

Our graduate degree programs may be for you if you are seeking to acquire essential knowledge and skills, advance your career, and compete successfully in the international job market in one of several new and emerging professions—the professions of the future. Our professional master's programs prepare you to take initiative, move nimbly across frameworks, and implement solutions to challenges worldwide. They do so by integrating knowledge across academic boundaries, combining theory with practice, and leveraging the combined expertise of our students, faculty, and leaders in business, industry, and government. Master's candidates develop the knowledge and skills needed for leadership positions in a variety of professional sectors.

Actuarial Science

The M.S. in Actuarial Science prepares postgraduates with strong mathematical aptitude to pass the first four industry examinations required for entry into and advancement in the field. The program gives promising students the opportunity to study with some of the best minds in the country, and provides an academic experience that extends beyond the limits of basic test preparation by providing a community of like-minded peers and rigorous and structured coursework.

Bioethics

The M.S. in Bioethics provides students with the training to work professionally on issues in bioethics, and grounds them in historical, philosophical, legal, and social-scientific approaches and models for addressing bioethics. The program prepares students to work in various capacities within this new and ever-growing field, and includes a concentration in global bioethics—the first of its kind in the United States.

Communications Practice

The M.S. in Communications Practice trains students to develop critical thinking, collaboration, ethical judgment, reasoning, persuasion, writing, and complex problem-solving skills. Aptitude in these areas is essential for success in today's rapidly changing communications industry.

Information and Knowledge Strategy

The M.S. in Information and Knowledge Strategy teaches students to plan, design and evaluate initiatives in knowledge and information across a wide spectrum of global environments, including corporations, government, educational and nonprofit institutions. Students also develop a critical insight into the legal, social and cultural factors that influence an organization's ability to leverage information, and learn to solve problems that impact process, human resources and technology. Courses are taught on-campus and online.

Narrative Medicine

The Narrative Medicine master's degree program seeks to strengthen the overarching goals of medicine, public health, and social justice, as well as the intimate, interpersonal experiences of the clinical encounter. The master's program aims to fulfill these objectives by educating a leadership corps of health professionals and scholars from the humanities and social sciences who will imbue patient care and professional education with the skills and values of narrative understanding.

Negotiation and Conflict Resolution

Columbia's Negotiation and Conflict Resolution master's degree program is designed to train professionals to be effective negotiators and problem-solvers. The curriculum emphasizes a pragmatic approach to resolving conflicts that arise in human resource management, community and labor organization, education and health administration, and law and business.

Sustainability Management

The M.S. in Sustainability Management program formally trains and educates sustainability professionals in a variety of industries. The program uses sophisticated environmental measurement tools and cutting edge environmental science to help students fully understand the systematic and organizational role of sustainability in any organization.

Requirements for admission

In order to qualify for a visa through Columbia University, master's degree students must be enrolled in full-time study for 12 or more points (the equivalent of four courses). International students for whom English is not a first language are required to demonstrate English proficiency. Applicants taking the TOEFL must have a score of at least 100 on the Internet-based version (600 paper based). Applicants taking the IELTS must receive a score of 7.5 or higher.

American Language Program

Whether your goal is to attend an American university or to achieve professional success in the global economy, the American Language Program (ALP) offers a variety of programs designed to dramatically increase your proficiency with written and spoken English. Courses are offered at 10 levels of English proficiency, from beginner through intermediate, to very highly advanced: on the Common European Framework of Reference for Languages (CEFR), from A1 to C1. Students who attend one or more semester-length course can make significant strides in preparing to compete in the international job market or to become stronger applicants to degree programs in the U.S. Using the cultural resources of New York City and the experiences and viewpoints of a vibrant international student population, the American Language Program faculty members help students think critically, creatively, and effectively—and to do it in accurate, sophisticated English.

Intensive English Program

Intensive Program

A series of intensive English courses that are offered year-round. These courses help students develop grammatical accuracy, pronunciation, fluency, listening and reading comprehension, and writing ability at all levels of English proficiency, from beginner to near-native speaker levels.

Special Programs

Advanced Academic Preparation

A seven-week summer course for students who are making plans to enter a degree program in the United States. The course includes sophisticated university-style seminar discussions, student presentations, and practice in academic writing: use of correct citation form, exploration of issues in academic honesty, and techniques for research paper writing. Students must present a TOEFL iBT score of 90+.

English for Professional Purposes: Business

English language course for business professionals and pre-M.B.A. students. This course employs the business case-study method, along with visits to New York businesses, and attendance at special lectures delivered by business professors and other professionals. Students must present a TOEFL iBT score of 90+ and a bachelor's degree, but not necessarily one in business.

English for Professional Purposes: Law

English language course for legal professionals and pre-law students. This course uses the fundamental concepts and the essential structures of the U.S. legal system as the context in which students solidify, expand and refine their use of advanced professional English. Students must present a TOEFL iBT score of 100+ and a degree in law, whether at the bachelor's level or higher.

Programs for High School Students

If you are a high school student entering grades 9 through 12 or freshman year of college, Columbia University's Summer Programs for High School Students (SPHSS) offers you the opportunity for intensive study and new experiences in New York City, Barcelona, and the Middle East.

Study in New York City

Columbia offers highly motivated students the opportunity of a lifetime: a world-class educational experience set in the most exciting city in the world. Students choose from a broad range of rigorous curricular options including the sciences, business, the arts, and more. SPHSS welcomes international students who are proficient in English from dozens of countries. Often international students select the College Preparatory curricular option which is an intensive review in four major skill areas: math, critical reading, expository writing, and study skills.

Study in Barcelona

Columbia offers a secondary school study-abroad program in Barcelona, Spain, where the academic experience includes immersion in one of the world's richest cultures. In this program, academic work breaks out of the classroom and into the city itself, providing an exciting and mind-expanding journey into Barcelona's art, culture, traditions, and heritage.

Study in the Middle East

The program combines study at Columbia University in New York City with study abroad at King's Academy, in Manja, Jordan. The program offers a unique chance to combine substantive reading and classroom work at Columbia and at the prestigious King's Academy, with field trips to several extraordinary historical sites in Jordan.
